Area Director Procurement
Central Europe & Southern Europe

Frankfurt am Main, 22 June 2018

Letter of recommendation

Fiber ProTector Norge AS and its subsidiaries have provided its anti -soil and stain treatments for carpets and upholstered furniture to several of our hotels in the Radisson Hotel Group.

Their preventative maintenance treatments have proven to be of great benefit to our hotels in regards to reducing direct maintenance cost and through lifecycle cost of the interiors.

As Area Director Procurement Central Europe & Southern Europe, my interest is that the heavy investment in FF&E, including upholstered furniture and carpets, is lasting as long as possible, keeps the good looks and is easy to maintain.

They also have a good revitalisation program for used installations, prior to protecting them in order to prolong the lifespan.

I can definitely highly recommend their services to any hotel facility, to protect the value of their interiors.

With kind regards.

Thomas Bauer
