AUSTRALIAN TRUSTED TRADER
INTERNATIONAL AEO AND TRADE FACILITATION

# Capabilities Statement

## Corporate Overview

Premium Surface Protection (PSP) provides technologically advanced and environmentally safe solutions for textile and furniture protection for commercial and residential interior fit outs.

PSP manufacture and globally distribute non-toxic products for the maintenance and protection of textiles tested by independent laboratories. Subsequently, they have been awarded WoolSafe, CleanSeal, and Oeko Tex Certification..

As the manufacturer, distributor, and service provider, they hold exclusive distribution rights to the world's most technically advanced and effective fabric protection products. They are the preferred anti-soil and stain treatment for premium hotel chains, cruise ships, airlines, public transport, theatres, corporate offices, and the manufacturers of custom-made exclusive carpets, rugs, furniture, and textiles.

Premium Surface Protection has a fine tuned business structure that provides its clients with a highly effective preventative maintenance system. This preventative maintenance system extends both the original appearance of their valuable assets and therefore their life cycle, reducing scheduled maintenance and saving on costs.

# Key Business Areas Servicing Australasia & Asia

## From

## What sets our company apart?

The Premium Surface Protection company specialises in preventative maintenance solutions which focus on keeping your textile assets looking new for longer and decreasing your yearly maintenance costs.

Their revolutionary products are able to penetrate and encapsulate individual carpet, rug or fabric fibres. After application, the fibres retain their natural properties like breathability, look and feel. Soiling is unable to penetrate the fibres and remains on the outside of the fibre. Therefore, vacuuming is easier, and when cleaning carpets, water is usually enough to remove any remaining contamination that has not been removed by the vacuum cleaner. The result is reduced wear and tear due to cleaning processes.

Additionally, their products provide antibacterial properties to carpets and fabrics to prevent the growth and spread of bacteria, fungus, and mould that can quickly grow and multiply in carpets, rugs, office chairs, and other textiles.

Premium Surface Protection is unique in the marketplace as its products do not contain any dangerous or harmful components, while having a long-lasting effect.

Due to Premium Surface Protection's superior trade compliance and supply chain security, they have been accredited as an Australian Trusted Trader by the Australian Border Force.

This accreditation ensures the import and export process is accelerated between all trade channels, including their own manufacturing facilities and client OEM factories.

With minimised barriers to trade, PSP can ensure business flows efficiently, allowing increased commercial viability for all stakeholders.

# ZERO CHEMICALS OF CONCERN AND FOREVER CHEMICALS

DECORGARD®

Just better chemistry for ☑ People ☑ Environment ☑ Earth

They are experts in their field on all things related to fibre and surface protection. At WEAVE, we proudly align with companies that have the same passion, drive and ethical standards in the product and service they offer, which is why we exclusively recommend Premium Surface protection for their rug protection formula Decorgard Organic Microseal.

We recommend that once receiving your new Weave rug to contact Premium Surface Protection directly. They will provide a free quote to treat your rug so that your treasured investment can continue looking as new as the day you first unrolled it.
